

Veteco 2018

El sector de ventana, fachada y protección solar volvió a tener en Veteco 2018 un espacio de reflexión y debate de primer nivel a mediados de noviembre. El encuentro se celebró conjuntamente con Construtec, Bimexpo, Archistone, Matelec y Matelec Lighting, en el marco de ePower&Building, con un registro global de casi 90.000 participantes profesionales, un 24% más que en la anterior edición de 2016. Además de los 140.000m² de espacio expositivo, que acogió la oferta de más de 300 empresas, Veteco ofreció en su edición número 16 una intensa agenda de jornadas y encuentros profesionales —como el Foro Iberoamericano del Cerramiento, que contó con la participación de las asociaciones sectoriales de varios países iberoamericanos— con el objetivo de favorecer el intercambio de experiencias y conocimiento en el sector. La edición de este año ha supuesto la definitiva consolidación de Veteco Solar,

creado en 2016 para dar respuesta a este sector, y una gran aceptación del nuevo Veteco Glass, enfocado a la industria del vidrio, dentro de este salón organizado por Ifema y promovido por la Asociación Española de Fabricantes de Fachadas Ligeras y Ventanas ASEFAVE.

The windows, facades and solar protection sector again found at Veteco 2018 a space for top-level reflection and debate in mid-November. The encounter was staged jointly with Construtec, Bimexpo, Archistone, Matelec and Matelec Lighting as part of ePower&Building, recording the overall attendance of almost 90,000 professionals, 24% more than at the previous edition in 2016. As well as the 140,000m² of exhibition space, which hosted the offering of more than 300 companies, Veteco offered at its 16th edition an intense agenda of professional sessions and meetings—such as the Iberoamerican

Forum of Windows, Doors and Facades, which included the participation of the sector associations from several Latin American countries—with the aim of favouring the exchange of experiences and knowledge in the industry. This year's edition represented the definitive consolidation of Veteco Solar, created in 2016 to meet the needs of this sector, plus a major acceptance of the new Veteco Glass, which focuses on the glass industry, as part of this trade fair organised by Ifema and promoted by ASEFAVE, the Spanish Association of Light Facades and Windows.

Savasana, Color del Año 2019

Savasana, Colour of the Year 2019. The company Valentine, a specialist in decoration and paints for private individuals, painters, architects and professional interior decorators, draws up annual colour charts for lovers of colour and decoration. On this occasion it presents 6 new hues that complement its "Color Revelation" catalogue. "Soft colours, easy to combine with the already existent in the colour range", says Céline de Acevedo, designer of colors at CIN Valentine. Among the new hues there is the Colour of the Year 2019. Next year's colour is inspired in wellness and meditation: Savasana #E727, a white greige (grey + beige) that transmits calm and combines with any type of decoration. 'Savasana' is the name of one of the main postures of relaxation in yoga, so that is fully in line with the sensation that the colour transmits. As well as the physical catalogue, the brand proposes the www.colorevelation.com website, a tool that allows you to consult the "Colour Revelation Trends 2019" Catalogue, order and receive it at home, browse through the collection's different colours and view the history of each one of them in the various videos. The "Colour Revelation" project has been awarded with a Laus Gold to excellence by ADG-FAD association in 2018.
